

ABSTRACT OF THE DISCLOSURE

An improvement in a piping arrangement for swing type hydraulic excavators is achieved. Piping is provided on a cylinder for an implement from a side of the swivel frame through the swing bracket, the swing bracket is formed on a side thereof with a piping hole, which extends outside from an interior thereof, and piping for that cylinder for an implement, which is disposed in the vicinity of the swing bracket, is performed from the interior of the swing bracket through the piping hole.
